

## New Product Announcement – Spicer<sup>®</sup> Dura-Tune<sup>®</sup> Center Bearing Assembly

Date: **April 18, 2019**

To: **All Dana Aftermarket Group Spicer Driveshaft Customers**

Dana Aftermarket Group is pleased to announce the release of our new Spicer Dura-Tune self-aligning center bearing assembly. Engineered for durability and tuned to provide industry-leading powertrain vibration isolation and dampening for reduced driver fatigue and improved vehicle satisfaction, new Spicer Dura-Tune self-aligning center bearing part number **10094142** will replace the **5003323** as well as the **500332370**.

- The new Dura-Tune center bearing addresses noise, vibration and harshness levels associated with the significantly higher drivetrain torque stresses and unique vibration frequencies with certain vehicles created by engine downspeeding and chassis lightweighting.
- Its patented design helps to ensure proper installation and alignment throughout the life of the vehicle, delivering a more consistent ride while promoting drivetrain longevity. The new design also provides a more user-friendly installation further reducing the possibility of future alignment-based issues.

**The universal design of the Dura-Tune 10094142 allows for the replacement of current standard SPL<sup>®</sup> and heavy-duty Spicer 10<sup>™</sup> Series center bearing assemblies, as well as competitive products and is available for retrofitting or as a replacement part through Dana Aftermarket.**

The new Spicer Dura-Tune Center Bearing Assembly 10094142 will be available 4/18/19 and will automatically supersede the 5003323 and 500332370 when supplies are exhausted. Your Dana Aftermarket representative can assist you with any additional questions that you may have.

Thank you for your continued support of Dana Aftermarket products!
