

## **PINION SEAL DESIGN CHANGE**

**DATE: December 5, 2023**

**TO: All Dana Aftermarket Group Spicer® Heavy Axle Customers**

**Affected Models: S110/S111/S130/S132/S140**

In November 2022, Dana released an improved Spicer® seal for the S110/S111/S130/S132/S140 Spicer® drive axles.

The new pinion seal part number is 10226476.

The new seal has a new design for improved performance for better sealing and heat capability.

It includes:

- 3 seal lips plus a dust lip.
- Advanced material for high-speed / high heat applications.
- Has the same profile as 127591.
- 100% backwards compatible with the current seal, 127591.

The seal installation tools for 127591 can be used with the new seal.

Service kits currently using pinion seal 127591 will be updated to the new seal, 10226476, as the inventory of 127591 is depleted.

Pricing information for the new seal can be found on your Danaaftermarket.com account.

If you need additional information, please contact your Dana Aftermarket representative.
