

SPICER®

Spicer Life® Series **SPL® 250 Lite Series** Driveshafts

Reduced vibration and weight, with improved performance.

The SPL® 250 Lite driveshaft is built with fewer parts than competitive offerings for reduced overall maintenance costs, inventory and complexity. Weight is also dramatically reduced, without sacrificing strength or performance. Dana's proprietary design and manufacturing methods greatly reduce vibration, balancing the Lite series to 50% of current specifications.

SPL® 250 Lite Series Driveshaft

SPL® 250 Lite series driveshafts are the next generation of Dana's robust series of driveshafts, optimized for the most popular configurations of heavy-duty commercial trucks. Designed with fewer components to reduce weight and vibration, these driveshafts offer reduced service inventory and maintenance.

Standard re-lube or service-free designs

- Universal joint kits are 100% interchangeable between both configurations

Torque ratings up to 25,000 Nm.

Common end yokes and u-joints with existing driveshaft counterparts

- Increased ease of service
- Simplified inventory

Improved balance delivers best balance specification in the industry

- Less driver fatigue
- Less annoyance
- Engineered to reduce noise, vibration, and harshness (NVH) levels

Enhanced Midship Design

Fewer components – 7 vs. 17 of traditional SPL

- Reduced complexity
- Reduced service inventory
- Reduced maintenance cost
- Reduced initial investment

Reduced weight

- Up to 35 lbs. lighter than other driveshafts in its class

Yoke shaft and spline sleeve manufactured as a set

- Offers simple ordering of a Spicer® midship assembly for easier installation
- Optimal matched-fit parts bring assembly back to OE-specifications
- Provides a more balanced, smoother operation
- Offers a more predictable installation

One piece midship assembly

- Design and manufacturing process allows the Lite series to be balanced to 50% of current specifications
- Allows for best in class NVH performance
